

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextboks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Total Points: 17 out of 30

Please provide comments on any aspect of the subject matter of this textbook:

- The chapter is clearly written. It is organized in a slightly different way than the previous two chapters. It does not include images and reads at a different level. If instructors wanted to cover attachment in more detail, it would provide a good supplement to a textbook more commonly used in a child development course because it covers some areas that are not typically covered. For example, it reviews attachment into adulthood. This might be a better fit for a lifespan development course.
- It does not include a text bank. It is a single chapter on attachment across the lifespan.
